

TECHNICAL CONSULTANT (M/F)

CastLabs is one of the key players in the fast growing online video delivery market. We offer exciting technologies on the leading edge of digital video by providing software and cloud services to online retailers, distributors, and system integrators. Our range of offerings help businesses worldwide deliver premium movie and TV content to their customers for high-quality video experiences across multiple platforms.

To assist with our growing client-base, we are looking for a Technical Consultant. With your experience you'll expand our *engineering and professional services* teams by deploying cutting-edge digital video delivery technology across international client projects. You'll also work with our partners to contribute to the integration of next-generation delivery systems to create the digital video services of tomorrow.

This is a challenging position that will require 'big picture' technical skills. With a broad-based knowledge of system engineering, your role will span all aspects of successful project delivery. You will be designing, planning, and implementing system architectures from a management as well as from a hands-on level.

As a Technical Consultant, you will be working very closely with clients primarily in the USA, European, and Southeast Asian markets. While you will mainly work with clients remotely, occasional travel to meet with customers will be part of your role. Attending trade shows, seminars, and conferences will also sometimes be required.

You will be part of a highly-qualified and motivated international team of experts working with leading companies in the technology and online movie/TV entertainment industry. We offer a flexible working environment with a high level of employee empowerment and responsibility as well as attractive remuneration and benefits.

Requirements

- A higher-education degree (university, technical college), preferably in information technology
- Excellent English language ability
- Knowledge of system design / architectures
- Expert in at least two of the following development technologies: Python/Django, C, C#, Java, ActionScript, JavaScript
- Knowledge of internet technologies (TCP/IP, DNS, routing, Linux, security, hardening, encryption standards) and mobile apps (Android, iOS)
- Knowledge of streaming/OTT technology, which may include:
 - video (e.g. MPEG-DASH, HLS, Smooth Streaming, HTML5, encoding)
 - audio (e.g. AAC, Dolby, DTS)
 - DRM (e.g. Microsoft PlayReady, Google Widevine, Adobe Primetime)
- Experience in a comparable position
- Organized, committed team player, excellent communicator, and a willingness to learn

Nice to haves

- › Understanding of AWS cloud computing

What we offer

- › A startup work environment in an established company
- › Open-minded and friendly team from all corners of the world
